

Subject Index to Volume 24

A

- A23187: *see* Calcium ionophore
 Acarbose, dietary, glucose flux from, G818
 Acetazolamide, bicarbonate secretion and, gastric, G320
 Acetylcholine
 regulation of contraction, myosin light chain phosphorylation and, gallbladder smooth muscle (guinea pig), G952
 release, L-glutamate stimulation of, G693
 Acidosis, intracellular, hydrogen-potassium-ATPase effects, oxynticopeptic cells (frog), G781
 Adenosine
 transport, liver plasma membrane vesicles, G716
 vasodilation and, intestinal mucosa, G9
 Adenosine diphosphate, regulation of calcium, gastric smooth muscle, G634
 Adenosine monophosphate, cyclic carbachol effects, colonic cells, G220
 chloride efflux pathways and, colonic epithelial cell line, G958
 dibutyl, gastrin effects and, histamine-stimulated aminopyrine, parietal cells, G621
 glutamatergic neural pathways and, myenteric plexus, G693
 pepsinogen secretion mediated by, prostaglandin E₂ effects, chief cells, G858
 potassium channels, oxyntic cells (bullfrog), G206
 protein kinase dependent on, anion channels in excised patches, G992
 sodium-hydrogen exchange, Caco-2 cells, G229
 somatostatin receptor effects, gastric muscle cell relaxation (guinea pig), G45
 Adenosine triphosphatase, potassium-activated, apical membrane of distal colon, G1005
 Adenosine triphosphate, regulation of calcium, gastric smooth muscle, G634
 Adenylate cyclase, pepsinogen secretion mediated by, prostaglandin E₂ effects, chief cells, G858
 Adrenergic nervous system, modulation, reactive hyperemia, G392
 Aging, sinusoidal and biliary glutathione efflux, liver, G648
 Alanine
 sodium uptake and, hepatocellular, G1024
 uptake, ethanol effects, basolateral plasma membrane, liver, G913
 Albumin
 facilitation, polyethylene, G896
 pancreatic permeability to, caerulein-induced acute pancreatitis, G685
 Alkaline phosphatase, developmental expression, intestine, G269
 Amiloride
 membrane potential and, gastric antrum (frog), G92
 sodium-hydrogen exchange, Caco-2 cells, G229

- Amino acids
 transport
 brush-border, chronic excluded jejunal limb, G22
 ethanol effects, basolateral plasma membrane, liver, G913
 nutrient extraction, cold exposure, intestine, G608
 small intestinal cells (guinea pig), G1030
 Amino-oligopeptidase, intestinal, differential regulation of, G866
 Amino-peptidase, enkephalin-stimulated contraction and, gastric muscle cells, G476
 Amino-peptidase N, intestinal, differential regulation of, G866
 Aminopyrine, histamine-stimulated accumulation, gastrin effects, parietal cells, G621
 Ammonium chloride, intracellular pH, gastric surface cell, G548
 Amylase
 secretion
 pancreas, atropine effects, G735
 pancreatic acinar cells, G22
 Anal sphincter, variation of resting pressure, healthy humans, G823
 Anion channels, outwardly rectifying, activation in excised patches, G992
 Arachidonic acid
 jejunal, radiation and indomethacin effects, G145
 transport, distal colonic mucosa, G451
 Arachidonic acid metabolites, chloride secretion and, distal colonic mucosa, G443
 Arterioles, dilation, submucosal neurons and (guinea pig), G136
 ATP: *see* Adenosine triphosphate
 ATPase: *see* Adenosine triphosphatase; Hydrogen-potassium-ATPase
 Atropine
 bicarbonate secretion and, proximal duodenal mucosal, G327
 gastric hypersecretion, G295
 motility, gastric blood flow and, G158
 pancreatic response and, bethanechol, CCK and food intake, G735
 Autoregulation, hypoxia or ischemia, postnatal intestine, G152
 Awake state, pepsin and gastric acid, hypersecretion, G295

B

- BAY K 8644, gastric cell disruption and, G119
 Bethanechol
 bicarbonate secretion and, proximal duodenal mucosal, G327
 gastric hypersecretion, G295
 motility, gastric blood flow and, G158
 myogenic control, esophageal, G377
 pancreatic response to, atropine effects, G735
 potassium channels, oxyntic cells (bullfrog), G206

- Bicarbonate
 gastric secretion, acetazolamide and, G320
 loss, secretagogues and, parotid acini, G111
 secretion, proximal duodenal mucosal, cholinergic regulation, G327
 sodium-coupled, transport, hepatocytes, G803
 Bile, formulation, circadian rhythm of, liver denervation effects, G799
 Bile acids
 cytotoxicity of fetal water and, G907
 secretion, sympathetic nerve regulation, liver, G775
 transport
 bacterial deconjugation and enterohepatic circulation of, G1065
 basolateral, hepatocytes, G820
 hepatic and ileal, G1057
 Bile canalicular membrane vesicles, adenosine transport in, G716
 Bile salts
 transport
 bacterial deconjugation and enterohepatic circulation of, G1065
 hepatic and ileal, G1057
 Blood flow: *see also* Circulation; Microcirculation
 colon, prostaglandins and, G332
 gastric, phasic changes in perfusion pressure and, G158
 gastric mucosal, intragastric capsaicin and, CGRP effects, G657
 gastrointestinal, neuropeptide Y and peptide YY modulation of, G701
 intestinal
 adenosine as a vasodilator, G9
 hypoxia or ischemia, newborn, G152
 intestinal mucosa, hypermetabolic sepsis and, G287
 Blood pressure: *see also* Pressure
 regulation, neuropeptide Y and peptide YY modulation of, G701
 Bombesin
 binding and processing, pancreatic acini, G57
 hormonal control, pancreas (chicken), G16
 regulation, intestinal CCK and somatostatin mRNA, G71
 somatostatin secretion stimulated by, gastrin mediation of, neurons in fundus, G885
 Brain-gut axis, reflex changes, intestinal tone, G280
 Brush-border membrane
 intestinal
 lactoferrin receptors in, fetal, G841
 nutrient extraction in cold exposure, G608
 Bypass: *see also* Shunt
 jejunal, hibernation and, effects on intestinal mucosa (squirrel), G37

C

- Caco-2 cells
 growth, diamine oxidase expression, EGF effects, G669

- Caco-2 cells (*continued*)
 intestinal, sodium-hydrogen exchanger from, G229
- Caerulein, acute pancreatitis induced by, microvascular permeability and, G685
- Calcitonin gene-related peptide
 capsaicin-stimulated, somatostatin release and, stomach, G770
 gastric hyperemic response and, intra-gastric capsaicin, G657
- Calcium
 increase, fatty acid effects, enteric endocrine cells, G497
 influx
 inositol 1,4,5-trisphosphate-dependent calcium, muscle cells, G937
 sustained fluid secretion and, sublingual mucous acini, G1043
 intracellular, carbachol and, colonic cells, G220
 intracellular concentration, myosin light chain-1 phosphorylation and, hepatocytes, G312
 mobilization, dependent on inositol 1,4,5-trisphosphate, intestinal muscle cells, G937
 potassium channels, oxyntic cells (bullfrog), G206
 regulation of contraction, myosin light chain phosphorylation and, gallbladder smooth muscle (guinea pig), G952
 release, phosphoinositide metabolism and, intestinal smooth muscle, G945
 steady-state cytosolic, ATP-dependent control, gastric smooth muscle, G634
- Calcium ionophore
 gastric cell disruption and, G119
 low-dose ethanol and, apical membrane potential, antrum (frog), G92
 myosin light chain-1 stimulation, hepatocytes, G312
- Calcium ions
 chloride efflux pathways and, colonic epithelial cell line, G958
 cytosolic, secretagogue effects, submandibular granular ducts and acini, G359
- Calcium phosphate, dietary, cytotoxicity of fecal water and, G907
- Camostate, microvascular permeability and, pancreas, G685
- Capsaicin
 CGRP stimulated by, somatostatin release and, stomach, G770
 intragastric, gastric hyperemic response to, CGRP effects, G657
- Carbachol
 dual effects, colonic cells, G220
 epithelial and muscle function, intestine, G166
 modulation, CCK receptors, pancreatic acini, G981
 muscarinic receptor, esophageal mucosa, G464
 regulation, pancreatic muscarinic receptors, G128
 synergistic interaction, *E. coli* heat-stable toxin, G592
- Carbohydrates
 absorption, glucose flux and, G818
 lactose absorption, colon, newborn (piglet), G1
 5(6)-Carboxyfluorescein diacetate, intracellular pH, gastric surface cell, G548
- Cardiac output, glucose uptake, hypermetabolic sepsis and, G287
- Catalase
 defenses against oxygen metabolites, gastric cells, G921
 mucous release and, gastric mucous cells, G662
- Catecholamines, apical tubulovesicles and hydrogen secretion, intestine (salamander), G50
- CCK: *see* Cholecystokinin
- Cell volume, regulation, chloride ions in, liver, G340
- CGRP: *see* Calcitonin gene-related peptide
- Chief cells, cAMP-mediated pepsinogen secretion, prostaglandin E_2 effects, G858
- Chloride
 efflux pathways, calcium ions and cAMP activation of, colonic epithelial cells, G958
 gastric secretion, acetazolamide and, G320
 junction potentials mediated by
 circular muscle, esophagus (opossum), G752
 circular muscle, ileum (guinea pig), G742
 loss, secretagogues and, parotid acini, G111
 secretion
 arachidonic acid metabolites and, distal colonic mucosa, G443
 carbachol effects, colonic cells, G220
 neural 5-hydroxytryptamine effects, distal colon (guinea pig), G833
 Chloride-bicarbonate exchanger, intracellular pH regulation and, hepatocytes, G512
- Chloride channels
 calcium ions and cAMP activation of, colonic epithelial cells, G958
 outwardly rectifying, activation in excised patches, G992
- Chloride ions, cell volume regulation and, liver, G340
- Cholecystokinin
 gallbladder response to, cholinergic dependence of, G565
 intestinal, regulation by bombesin, G71
 pancreatic response to, atropine effects, G735
- Cholecystokinin-octapeptide, potassium transport and, exocrine pancreas, G570
- Cholesterol, metabolism, hydrophobic surfactant effects, intestinal mucosa, G256
- Chromatography, high-performance liquid, EGF, gastrointestinal processing, suckling, G790
- Chylomicrons
 intestinal, absorption of glycerol tristearate, G239
 transport, Pluronic L81 effects, intestinal mucosa, G256
- Cimetidine, intracellular pH regulation and, oxynticopeptic cells (frog), G781
- Circulation: *see also* Blood flow; Microcirculation
 enterohepatic, norursolic acid transport, G1057, G1065
 intestinal, adrenergic nerves and reactive hyperemia, G392
- Colchicine, transcellular transport pathway, liver, G305
- Cold, exposure, nutrient extraction in, G608
- Colitis, contraction defect and, colonic smooth muscle, G987
- Colon
 apical membrane, potassium-activated ATPase, G1005
 arterioles, vasodilator innervation of (guinea pig), G136
 cancer, dietary calcium phosphate and cytotoxicity of fecal water, G907
 descending, fluid absorption, species differences (cattle, sheep), G433
 distal, chloride secretion, neural 5-hydroxytryptamine effects (guinea pig), G833
 high-amplitude propagated contractions, prolonged ambulatory monitoring, G263
 inflammation and blood flow, prostatic glands and, G332
 lactose absorption, newborn (piglet), G1
 proximal, nitric oxide and nitrosocysteine in, G553
 smooth muscle, contraction defect, ulcerative colitis, G987
 submucous neurons in, serotonin receptors on (guinea pig), G1017
- Colonic cells, dual effects of carbachol, G220
- Colonic mucosa
 distal
 arachidonic acid metabolites and chloride secretion in, G443
 arachidonic acid transport mechanism, G451
 inflammation, contraction defect, ulcerative colitis, G987
- Colonocytes, chloride efflux pathways, calcium ion and cAMP-activated, G958
- Coupling
 cell, electric properties, gas-permeable membrane, G407
 cell-to-cell, pancreatic acinar cells, G22
- Current, short-circuit, epithelial and muscle function, intestinal, G166
- Cyanocobalamin, pancreatic permeability to, caerulein-induced acute pancreatitis, G685
- Cystic fibrosis
 calcium ion and cAMP-activated chloride efflux, colonic epithelial cells, G958
 cAMP-dependent protein kinase, anion channels in excised patches, G992
- Cytokines, specific effects of interleukin-1, gastric acid secretion, G559
- Cytoprotection, glutathione and, ethanol-induced gastric injury, G966

D

- Deferoxamine, mucous release and, gastric mucous cells, G662
- Deoxyribonucleic acid, intestinal mucosal growth, luminal polyamine effects, G504
- Deuterium oxide, substitute for labeled water, liver multiple-indicator dilution studies, G929
- Development: *see also* Growth
 lactose absorption, colon, newborn (piglet), G1

Diabetes, streptozotocin-induced, altered glucose carrier expression in, G585
 Diamine oxidase, expression, EGF effects, growth in Caco-2 cells and, G669
 Dibutyladenosine monophosphate, cyclic: *see* Adenosine monophosphate, cyclic
 α -Difluoromethylornithine, intestinal mucosal growth and, G504
 Digestion, nutrient extraction, cold exposure effects, G608
 Dipeptidyl peptidase IV expression
 EGF effects, growth in Caco-2 cells and, G669
 jejunal crypt-villus axis, mRNA level, G763
 Diphenyliodonium, hypoxia-reoxygenation, Kupffer cells, G602
 Disaccharides, dietary, glucose flux from, G818
 Duodenal mucosa, proximal, bicarbonate secretion, G327
 Duodenum, contraction and accommodation (guinea pig), G364

E

EGF: *see* Epidermal growth factor
 Eicosatetraenoic acid, hydroxy-6,8,11,14-, chloride secretion and, distal colonic mucosa, G443
 Electrical activity, slow-wave, terminal antrum, G78
 Electrogastrogram, cutaneous, postprandial gastric emptying and (monkey), G248
 Electrolytes
 lactose absorption, colon, newborn (piglet), G1
 secretion
 E. coli heat-stable toxin effects, T84 cells, G592
 neuropeptide Y and peptide YY modulation of, G701
 transport, calcium-dependent, sublingual mucous acini, G1043
 Endocrine cells, enteric, fatty acid effects on neurotensin and calcium, G497
 Endothelial cells, energy for, glutamine and fatty acid oxidation, G185
 Endothelin, nicotinic transmission and, colonic parasympathetic ganglia, G628
 Endothelium-derived relaxing factor, nitric oxide and, smooth muscle hyperpolarization (opossum), G1012
 Enkephalinase, enkephalin-stimulated contraction and, gastric muscle cells, G476
 Enteric nerves
 esophagus, chloride-mediated junction potentials in (opossum), G752
 ileum, chloride-mediated junction potentials in (guinea pig), G742
 Enteric nervous system
 esophageal muscle response, nitric oxide mediation (opossum), G401
 nitric oxide, smooth muscle hyperpolarization (opossum), G1012
 serotonin, chloride secretion and, distal colon (guinea pig), G833
 submucosal neurons
 arteriolar dilation and (guinea pig), G136
 serotonin receptors on, colon (guinea pig), G1017
 Enterocytes, small intestine, amino acid transport (guinea pig), G1030
 Epidermal growth factor
 cytosolic calcium ions and, submandibular granular ducts and acini, G359
 diamine oxidase expression and, growth in Caco-2 cells, G669
 gastrointestinal processing of, suckling, G790
 Epithelial cells
 colonic, calcium ion and cAMP-activated chloride efflux pathways in, G958
 polarity, adenosine transport, liver, G716
Escherichia coli, heat-stable toxin, synergistic interaction, carbachol, G592
 Esophageal mucosa, muscarinic receptor subtyping, G464
 Esophagus
 circular muscle, chloride-mediated junction potentials in (opossum), G752
 muscarinic receptor subtyping, G464
 muscle responses, nitric oxide mediation of (opossum), G401
 myogenic oscillatory mechanism, smooth muscle contraction, G377
 peristalsis in, intra-abdominal pressure effects, G417
 peristaltic pressure wave, topography of, G677
 sphincter, longitudinal muscle activity (opossum), G974
 Ethanol
 alanine uptake and, basolateral plasma membrane, liver, G913
 chronic administration, impairment of hepatic insulin receptors, G199
 gastric cell disruption and, G119
 injury, mucosal glutathione protection against, stomach, G966
 membrane potential and, gastric antrum (frog), G92
N-Ethylmaleimide, glutathione and, ethanol-induced gastric injury, G966
 Exocrine gland
 acini and, secretagogue effects on calcium ions, G359
 bicarbonate and chloride loss, secretagogues and, G111
 Exopeptidase, expression, jejunal crypt-villus axis, mRNA level, G763

F

Fat, cholesterolemic effects, intestinal, G239
 Fatty acids
 absorption, intestinal, G239
 free
 sodium uptake and, hepatocytes, G1024
 uptake by polyethylene, G896
 long-chain, electrochemical driving forces in liver, G83
 neurotensin release and increased calcium, enteric endocrine cells, G497
 oxidation, energy for Kupffer and endothelial cells, G185
 transport, hepatic, model, G872
 Feeding
 caloric meals, postprandial gastric emptying and electrogastrogram (monkey), G248
 dietary calcium phosphate, cytotoxicity of fecal water and, G907
 dietary lipids, ischemia-reperfusion injury, G523

liquid diet, inhibition of activity-induced parotid growth, G723
 pancreatic response to, atropine effects, G735
 sham
 acetazolamide and bicarbonate secretion, G320
 cholinergic regulation of bicarbonate secretion, G327
 Fetus, intestinal brush-border membrane, lactoferrin receptors in, G841
 Fluid
 absorption, descending colon, species differences (cattle, sheep), G433
 transport, calcium-dependent, sublingual mucous acini, G1043
 Forskolin
 intracellular pH regulation and, oxynticopeptic cells (frog), G781
 sodium-hydrogen exchange, Caco-2 cells, G229
 Fundus, antrum and intrinsic neurons, somatostatin secretion, G885

G

Galactose, lactose transport and, colon, newborn (piglet), G1
 Gallbladder
 response to CCK, cholinergic dependence of, G565
 smooth muscle, myosin light chain phosphorylation and contraction in (guinea pig), G952
 Gas, hydrogen, clearance, stomach, G1037
 Gastric acid
 acetazolamide, bicarbonate secretion and, G320
 glutathione protection from, gastric mucosal cells, suckling, G65
 pepsin and, hypersecretion, awake state, G295
 secretion
 neuropeptide Y and peptide YY modulation of, G701
 secretagogue-specific effects of interleukin-1, G559
 Gastric antrum
 apical membrane potential in, low-dose ethanol effects (frog), G92
 terminal, electrical slow-wave activity, G78
 Gastric cells
 antioxidant defenses, against oxygen metabolites, G921
 integrity of, calcium-modifying agents and, G119
 Gastric emptying
 duodenal accommodation (guinea pig), G364
 ileal oleate effects, G458
 postprandial, cutaneous electrogastrogram and (monkey), G248
 Gastric mucosa
 barrier, low pH (pig), G827
 damage, vagal stimulation effects, G104
 dysfunction, ischemia-reperfusion-induced, neutrophils and, G490
 glutathione protection, ethanol injury, G966
 injury, aggravation by intravenous nicotine, G1037
 Gastric mucosal cells
 glutathione protection of, suckling, G65
 mucous release, oxygen radicals and, G662

- Gastric surface cells, pH, measurement of, G548
- Gastrin
gastric hypersecretion, G295
histamine-stimulated aminopyrine accumulation and, parietal cells, G621
- Gastrin-releasing peptide, somatostatin secretion stimulated by, gastrin mediation of, neurons in fundus, G885
- Gastrointestinal tract
EGF processing, suckling, G790
muscarinic receptor subtyping, G464
- Gastroparesis, α_2 -adrenergic model of, G426
- Gene expression, pancreatic, acute experimental pancreatitis, G485
- Glucagon, intestinal, reflex changes in tone, G280
- Glucokinase, ethanol effects, liver, G199
- Glucose
flux, dietary disaccharides, G818
lactose transport and, colon, newborn (piglet), G1
oxidation, energy for Kupffer and endothelial cells, G185
transport, nutrient extraction, cold exposure, intestine, G608
uptake, intestinal mucosa, hypermetabolic sepsis and, G287
- Glucose carrier, altered expression, streptozotocin-induced diabetes, G585
- α -Glucosidase, brush-border, postinsertional processing, intestine, G847
- L-Glutamate, stimulation, acetylcholine release, myenteric plexus, G693
- Glutamine
oxidation, energy for Kupffer and endothelial cells, G185
sodium uptake and, hepatocellular, G1024
transport, brush-border, chronic excluded jejunal limb, G22
- Glutathione
defenses against oxygen metabolites, gastric cells, G921
efflux, vasopressor and protein kinase C effects, liver, G578
liver cell injury, endotoxin shock, G1051
protection, mucosal ethanol injury, stomach, G966
protection from acid, gastric mucosal cells, suckling, G65
sinusoidal and biliary efflux, aging and, liver, G648
- Glycerol trioleate, absorption of glycerol tristearate and, intestine, G239
- Glycerol tripalmitate, absorption of glycerol tristearate and, intestine, G239
- Glycerol tristearate, absorption, intestine, G239
- Glycerol trioleate, absorbed, portal transport of, G530
- Glycogenolysis, histamine, hepatocytes, G1000
- Glycoproteins
membrane, differential regulation, intestine, G866
mucus secretion, small intestinal, ileal conduit as model for, G728
- Growth: *see also* Development
intestinal mucosa, luminal polyamines and, G504
parotid, activity-induced, inhibition of, G723

- Guanosine monophosphate, cyclic, calcium synergy and, chloride secretion, T84 cells, G592
- Gut: *see* Intestine

H

- Hepatocytes
cell volume regulation, chloride ions and, G340
electric properties of, gas-permeable membrane, G407
energy for, glutamine and fatty acid oxidation, G185
histamine, glycogenolytic action in, G1000
insulin receptors, impairment during chronic ethanol, G199
intracellular pH, chloride-bicarbonate exchanger role in, G512
myosin light chain-1 phosphorylation, stimulation by vasopressin and A23187, G312
neutrophil-induced injury, endotoxic shock, G1051
plasma membrane, hydrogen-bicarbonate transport, G803
sodium uptake, oleate effects, G1024
- Hexamethonium, reactive hyperemia, adrenergic nerves and, G392
- Hibernation, jejunal bypass and, mucosal structure and function (squirrel), G37
- Histamine
aminopyrine accumulation stimulated by, gastrin effects, parietal cells, G621
gastric hypersecretion, G295
glycogenolytic action of, hepatocytes, G1000
intracellular pH regulation and, oxynticopeptic cells (frog), G781
- Hormonal control, pancreas, gastrin-releasing peptide and (chicken), G16
- Hydrogen, secretion, small intestine (salamander), G50
- Hydrogen-bicarbonate, plasma membrane transport, hepatocytes, G803
- Hydrogen peroxide
defenses against oxygen metabolites, gastric cells, G921
mucous release and, gastric mucous cells, G662
- Hydrogen-potassium-ATPase, intracellular pH regulation and, oxynticopeptic cells (frog), G781
- Hydrolase, membrane, postinsertional processing, intestine, G847
- Hydroxyl radical, mucous release and, gastric mucous cells, G662
- 5-Hydroxytryptamine: *see* Serotonin
- Hyperemia, reactive, adrenergic modulation of, G392
- Hyperpolarization, nonadrenergic, noncholinergic, proximal colon, G553
- Hypertension, portal, postoperative course after portacaval anastomosis, G1072
- Hypoxia
ischemia and, autoregulation, postnatal intestine, G152
reoxygenation and, Kupffer cells, superoxide anion radical release, G602

I

- Ileal conduit, model, small intestinal mucous glycoprotein secretion, G728

- Ileum
adenosine as a vasodilator, G9
circular muscle, chloride-mediated junction potentials in (guinea pig), G742
- Indomethacin
gastric injury induced by, oxygen radicals and, G470
microcirculatory disturbance and, intestinal ulcer, G213
radiation and, jejunal prostaglandins and motility, G145
- Inositol 1,4,5-trisphosphate
calcium mobilization dependent on, muscle cells, intestine, G937
metabolism, intestinal smooth muscle, G945
- Insulin, pancreatic permeability to, caerulein-induced acute pancreatitis, G685
- Interdigestive motor complex, intestinal, reflex changes in tone, G280
- Interleukin-1, secretagogue-specific effects, gastric acid secretion, G559
- Intestinal mucosa
adenosine vasodilation of, G9
cholesterol metabolism, hydrophobic surfactant effects, G256
glucose uptake, hypermetabolic sepsis and, G287
growth, luminal polyamines and, G504
hibernation, jejunal bypass effects and (squirrel), G37
- Intestine
absorbed lipids, portal transport of, G530
absorption
brush-border membrane, lactoferrin receptors, fetus, G841
nutrient extraction in cold exposure, G608
altered glucose carrier expression, streptozotocin-induced diabetes, G585
crypt-villus axis, dipeptidyl peptidase IV expression in, G763
epithelial and muscle functions, Ussing chamber to monitor, G166
epithelial cell, *E. coli* heat-stable toxin, chloride secretion and, G592
glycerol tristearate absorption, glycerol tripalmitate and glycerol trioleate effects, G239
inositol 1,4,5-trisphosphate-dependent calcium, muscle cells, G937
phosphoinositide metabolism, smooth muscle, G945
postnatal, hypoxic or ischemic, autoregulation in, G152
postprandial motility, ileal oleate effects, G458
submucous neurons in, serotonin receptors on (guinea pig), G1017
sucrase- α -dextrinase brush-border precursor, postinsertional processing of, G847
surfactant-like particles, developmental expression, G269
tone, reflex changes in, G280
ulcer, indomethacin-induced, microcirculatory disturbance, G213
- Intestine, small
amino acid transport, cells (guinea pig), G1030
CCK and somatostatin mRNA, bombesin regulation of, G71

- hydrogen secretion, cell apical morphology and (salamander), G50
- ischemia-reperfusion injury, ornithine decarboxylase in repair of, G523
- mucous glycoprotein secretion, ileal conduit as model for, G728
- Ionomycin, low-dose ethanol and, apical membrane potential, antrum (frog), G92
- Iron, absorption, intestinal brush-border membrane, fetal, G841
- Ischemia
 - hypoxia and, autoregulation, postnatal intestine, G152
 - splanchnic, reperfusion and, LTB₄ antagonist actions in, G191
- Isoproterenol, somatostatin receptor effects, gastric muscle cell relaxation (guinea pig), G45

J

- Jejunal mucosa, injury and restitution, lipid-induced, G384
- Jejunum
 - adenosine as a vasodilator, G9
 - amino-oligopeptidase regulation, G866
 - bypass, hibernation and, mucosal structure and function (squirrel), G37
 - chronic excluded limb, regulation of brush-border amino acid transport, G22
 - crypt-villus axis, dipeptidyl peptidase IV expression in, G763
 - hydrogen secretion, cell apical morphology and (salamander), G50
 - prostaglandins, after X-irradiation, G145
- Junction, gap, acinar cell coupling, G22

K

- Kupffer cells
 - energy for, glutamine and fatty acid oxidation, G185
 - hypoxia-reoxygenation in, superoxide anion radical release, G602
 - superoxide anion generation, TNF- α effects, G891

L

- Lactate, oxidation, energy for Kupffer and endothelial cells, G185
- Lactoferrin, receptors: *see* Receptors
- Lactose, absorption, colon, newborn (piglet), G1
- Leukotriene B₄ antagonist, protective actions, splanchnic ischemia and reperfusion, G191
- Ligands, protein-bound, hepatic uptake of, model, G872
- Lipids
 - absorbed, portal transport of, G530
 - absorption
 - intestinal, ischemia-reperfusion injury, G523
 - ischemia-reperfusion-induced mucosal dysfunction, G490
 - epithelial injury induced by, jejunal mucosa, G384
 - intestinal absorption, Pluronic L81 effects, G256
 - neurotensin release and increased calcium, enteric endocrine cells, G497
- Lipoprotein lipase, triacylglycerol hydrolysis and, newborn liver, G641

- Lipoproteins
 - metabolism, ischemia-reperfusion-induced mucosal dysfunction, G490
 - very low density, intestinal absorption, G239
- 5-Lipoxygenase, microcirculatory disturbance and, intestinal ulcer, G213
- Liver
 - basolateral plasma membrane, ethanol effects on alanine uptake, G913
 - cell volume regulation, chloride ions and, G340
 - denervation, circadian rhythm of bile synthesis and, G799
 - encephalopathy, postoperative course after portacaval anastomosis, G1072
 - glutathione efflux from, vasopressin and protein kinase C effects, G578
 - insulin receptors, impairment during chronic ethanol, G199
 - Kupffer cells, superoxide anion radical release in hypoxia-reoxygenation, G602
 - multiple-indicator dilution studies, deuterium oxide as substitute for labeled water in, G929
 - non-bile salt organic anions, transcellular transport pathway, G305
 - plasma membrane vesicles, adenosine transport in, G716
 - processing, recombinant renin, G349
 - sinusoidal and biliary glutathione efflux, aging and, G648
 - sodium-bile acid cotransporter, 48-kDa protein component of, G820
 - superoxide anion generation, TNF- α effects, G891
 - sympathetic nerve, regulation of bile secretion, G775
 - transport, fluorescent stearate derivative, G83
 - triacylglycerol hydrolysis in, lipoprotein lipase effects, newborn, G641
 - uptake, protein-bound ligands, model, G872
 - venular pressures, G539
- Liver cells: *see* Hepatocytes
- LTB₄: *see* Leukotriene B₄
- Lymph, intestinal, ornithine decarboxylase in repair of ischemia-reperfusion injury, G523
- Lysosomal enzymes, gastric cell disruption and, G119
- Lysosomes
 - regulation, pancreatic muscarinic receptors, G128
 - renin, hepatic processing, G349

M

- Macrophages, hypoxia-reoxygenation in, superoxide anion radical release, G602
- Magnesium, potassium channels, oxyntic cells (bullfrog), G206
- Manometry
 - longitudinal muscle activity, lower esophageal sphincter (opossum), G974
 - monitoring of propagated contractions, colon, G263
- Membrane
 - apical
 - colon, potassium-activated ATPase, G1005

- potentials, ethanol and, antrum (frog), G92
- basolateral, liver, ethanol effects on alanine uptake, G913
- gas-permeable, electric properties of hepatocytes on, G407
- Mesenteric artery
 - splanchnic ischemia and reperfusion, LTB₄ antagonist in, G191
 - superior, ornithine decarboxylase in repair of, G523
- N-Methyl-D-aspartate, glutamatergic neural pathways and, myenteric plexus, G693
- Microcirculation: *see also* Blood flow; Circulation
 - gastrointestinal, vasodilator innervation of colonic arterioles (guinea pig), G136
- Microscopy
 - confocal laser scanning, dipeptidyl peptidase IV expression, jejunum, G763
 - intracellular pH, gastric surface cell, G548
- Microspheres
 - intestinal, hypermetabolic sepsis and glucose uptake, G287
 - radiolabeled, portal hypertension, model, G1072
- Microtubules, non-bile salt organic anions, transcellular transport pathway, G305
- Models
 - α_2 -adrenergic, gastroparesis, G426
 - ileal conduit, small intestinal mucus glycoprotein secretion, G728
 - polyethylene, uptake of free fatty acids, G896
 - portal hypertension, G1072
 - protein-bound ligands, hepatic uptake, G872
- Monensin
 - sodium uptake and, hepatocellular, G1024
 - transcellular transport pathway, liver, G305
- Motility
 - esophageal
 - myogenic oscillatory mechanism, G377
 - peristaltic pressure wave, G677
 - gastric
 - blood flow and, G158
 - postprandial gastric emptying and electrogastrogram (monkey), G248
 - gastrointestinal
 - gastroparesis model, G426
 - nitric oxide and nitrosocysteine in, G553
 - nitric oxide-mediated hyperpolarization (opossum), G1012
 - nitric oxide mediation (opossum), G401
 - intestinal
 - postprandial, ileal oleate effects, G458
 - reflex changes in tone, G280
- Mucin
 - gastric
 - gelation, low pH and (pig), G827
 - low pH (pig), G827
- Multiple-indicator dilution studies, liver, deuterium oxide as substitute for labeled water, G929
- Muscarinic agonists, colonic cells, G220
- Muscle, longitudinal, activity, lower esophageal sphincter (opossum), G974

Muscle, smooth

circular

- chloride-mediated junction potentials, esophagus (opossum), G752
- chloride-mediated junction potentials, ileum (guinea pig), G742

- colonic, contraction defect, ulcerative colitis, G987

esophageal

- mechanism for contraction, G377
- nitric oxide mediation of responses (opossum), G401

- gallbladder, myosin light chain phosphorylation and contraction in (guinea pig), G952

- gastric, ATP in regulation of calcium, G634

- hyperpolarization, nitric oxide mediation of (opossum), G1012

intestinal

- epithelial functions and, monitoring, G166

- inositol 1,4,5-trisphosphate-dependent calcium, G937

- phosphoinositide metabolism in, G945
- radiation and indomethacin effects, G145

- terminal antrum, electrical slow-wave activity, G78

Muscle cells

- gastric, enkephalin-stimulated contraction and peptidases, G476

- relaxation, inhibition by somatostatin (guinea pig), G45

smooth

- cholinergic dependence of gallbladder response to CCK, G565

- intestinal, lipid-induced injury and restitution, G384

- Myeloperoxidase, activity, intestinal, ischemia and reperfusion, G191

- Myenteric plexus, glutamatergic neural pathway in, G693

- Myoelectric complex, migrating, slow-wave frequency and locking during, G1079

- Myosin light chain, phosphorylation, smooth muscle, gallbladder (guinea pig), G952

- Myosin light chain-1, phosphorylation, vasopressin and A23187 stimulation of, G312

N

- NADPH oxidase, hypoxia-reoxygenation and, superoxide anion radical release, Kupffer cells, G602

- Neostigmine, motility, gastric blood flow and, G158

- Neural pathway, glutamatergic, myenteric plexus, G693

Neurons

- afferent, gastric CGRP and somatostatin, G770

- antrum and intrinsic, fundus, somatostatin secretion, G885

- cholinergic, serotonin, chloride secretion and, distal colon (guinea pig), G833

- parasympathetic, nicotinic transmission in, endothelin effects, G628

- presynaptic cholinergic, gallbladder response to CCK and, G565

- submucosal, cholinergic and noncholinergic, arterioles and, colon (guinea pig), G136

- submucous, serotonin receptors on, colon (guinea pig), G1017

- Neuropeptidase, enkephalin-stimulated contraction and, gastric muscle cells, G476

- Neuropeptides, regulation, intestinal CCK and somatostatin mRNA, G71

- Neuropeptide Y, modulation, gastrointestinal blood flow and function, G701

- Neurotensin, release, fatty acid effects, enteric endocrine cells, G497

Neutrophils

- accumulation, intestinal ulcer, G213

- colonic, inflammation and blood flow, prostaglandins in, G332

- ischemia-reperfusion-induced dysfunction and, gastric mucosa, G490
- liver injury induced by, endotoxin shock, G1051

- splanchnic ischemia and reperfusion, LTB₄ antagonist in, G191

- superoxide anion generation, TNF- α effects, G891

Newborn

- intestine, autoregulation in hypoxia or ischemia, G152

- lactose absorption, colon (piglet), G1

- triacylglycerol hydrolysis, lipoprotein lipase effects, liver, G641

- Nicotine, intravenous, aggravation of mucosal injury, stomach, G1037

- Nicotinic transmission, endothelin effects, colonic parasympathetic ganglia, G628

- Nigericin, intracellular pH, gastric surface cell, G548

Nitric oxide

- hyperpolarization and, proximal colon, G553

mediation

- esophageal muscle (opossum), G401
- smooth muscle hyperpolarization (opossum), G1012

- Nitrosocysteine, hyperpolarization and, proximal colon, G553

- Nonsteroidal anti-inflammatory drugs, gastric injury induced by, oxygen radicals and, G470

Norepinephrine

- apical tubulovesicles and hydrogen secretion, intestine (salamander), G50

- venular pressure and, hepatic, G539

Norurocholic acid

transport

- bacterial deconjugation and enterohepatic circulation of, G1065

- hepatic and ileal, G1057

- Nucleosides, transport, liver plasma membrane vesicles, G716

- Nutrients, extraction, cold exposure and, G608

O

Oleate

- ileal, postprandial intestinal motility and, G458

- sodium uptake and, hepatocellular, G1024

Oleic acid

- neurotensin release and increased calcium, enteric endocrine cells, G497

- uptake, polyethylene, G896

Omeprazole

- gastric hypersecretion, G295

- intracellular pH regulation and, oxynticoptic cells (frog), G781

- potassium channels, oxyntic cells (bullfrog), G206

- Organic anions, non-bile salt cholephilic, transcellular transport pathway, G305

Ornithine decarboxylase

- intestinal mucosal growth and, G504

- repair of ischemia-reperfusion injury, small intestine, G523

- Oxygenation, intestinal, hypoxia or ischemia, newborn, G152

- Oxygen metabolites, antioxidant defenses against, gastric cells, G921

Oxygen radicals

- generation, TNF- α and, Kupffer cells and liver, G891

- indomethacin and, gastric injury, G470

- mucous release and, gastric mucous cells, G662

- Oxyntic cells, electrical characteristics, inward-rectifying potassium channel (bullfrog), G206

- Oxynticoptic cells, intracellular pH, regulation by hydrogen-potassium-ATPase (frog), G781

P

- Palmitate, oxidation, energy for Kupffer and endothelial cells, G185

- Palmitic acid, uptake, polyethylene, G896

Pancreas

- basolateral membrane of acinar cells, potassium transport across, G570

- enzyme secretion (chicken), G16

- gene expression, acute experimental pancreatitis, G485

- junctional communication, acinar cells, G22

- microvascular permeability, caerulein-induced acute pancreatitis, G685

- response to bethanechol, CCK, and feeding, atropine effects, G735

- secretion, neuropeptide Y and peptide YY modulation of, G701

Pancreatic acinar cells

- basolateral membrane, potassium transport across, G570

- bombesin binding and processing, G57

- junctional communication, G28

- muscarinic receptors in, agonist-induced downregulation, G128

Pancreatic acini

- bombesin binding and processing, G57

- CCK receptors in, carbachol modulation of, G981

- muscarinic receptors in, agonist-induced downregulation, G128

Pancreatitis

- acute experimental, pancreatic gene expression during, G485

- caerulein-induced, microvascular permeability in, G658

- Parasympathetic ganglia, colonic, nicotinic transmission in, endothelin effects, G628

- Paraventricular nucleus, vagal stimulation, gastric damage and, G104

- Parietal cells, aminopyrine accumulation, histamine-stimulated, gastrin effects, G621

- Parotid acini, bicarbonate and chloride loss, secretagogues and, G111

- Parotid gland, growth, activity-induced, inhibition of, G723
- Pepsin, gastric acid and, hypersecretion, awake state, G295
- Peptidases, enkephalin-stimulated contraction and, gastric muscle cells, G476
- Peptides
 degradation, gastric muscle cells, G476
 gastrin-releasing, hormonal control of pancreas (chicken), G16
 intestinal, release, enteric endocrine cells, G497
 regulatory, information theory, G171
 vasoactive intestinal, muscle cell relaxation and (guinea pig), G45
- Peptide YY, modulation, gastrointestinal blood flow and function, G701
- Peristalsis
 colon, monitoring of, G263
 esophageal
 intra-abdominal pressure effects, G417
 myogenic control, G377
 topography of, G677
 intestinal, reflex changes in tone, G280
- Permeability
 calcium, membrane potential and, antrum (frog), G92
 microvascular, caerulein-induced acute pancreatitis, G685
 mucosal, indomethacin, oxygen radical effects, G470
 tight junction, vasopressor and protein kinase C effects, liver, G578
- pH
 intracellular
 chloride-bicarbonate exchanger in regulation of, hepatocytes, G512
 gastric surface cell, G548
 intestinal Caco-2 cell line, G229
 intracellular and biliary, ursodeoxycholic acid, G373
 low, gastric mucin (pig), G827
- Phenoxybenzamine, reactive hyperemia, adrenergic nerves and, G392
- Phlorizin, intestinal adaptation, streptozotocin-induced diabetes, G585
- Phorbol esters, glutathione efflux and, liver, G578
- Phosphatidylcholine, developmental expression, intestine, G269
- Phospho(enol)pyruvate carboxykinase, ethanol effects, liver, G199
- Phosphoinositide, metabolism, intestinal smooth muscle, G945
- Phospholipids, absorption, intestinal, G239
- Pluronic L81, cholesterol metabolism and, intestinal mucosa, G256
- Polyamines
 expression, EGF effects, growth in Caco-2 cells and, G669
 luminal, small intestinal mucosal growth and, G504
- Polyethylene, free fatty acid uptake, G896
- Portal vein, lipid transport, G530
- Potassium
 ATPase activated by, apical membrane of distal colon, G1005
 gastric secretion, acetazolamide and, G320
 transport, exocrine pancreas, G570
- Potassium channels
 calcium-activated, nitric oxide and nitrosocysteine in, G553
 inward-rectifying, electrical characteristics, oxyntic cells (bullfrog), G206
- Potentials
 excitatory postsynaptic, endothelin effects, colonic parasympathetic ganglia, G628
- junction
 chloride-mediated, circular muscle, ileum (guinea pig), G742
 chloride-mediated, esophageal circular muscle (opossum), G752
- membrane
 hydrogen-bicarbonate transport, hepatocytes, G803
 liver, chloride ions and, G340
 terminal antrum, G78
- Pressure: *see also* Blood pressure
 intra-abdominal, esophageal peristalsis and, G417
 perfusion, gastric contractions and, G158
 peristaltic wave, esophageal, topography of, G677
 portacaval, postoperative course after portacaval anastomosis, G1072
 resting, variation, anal, healthy humans, G823
 venular, liver, G539
- Propranolol, reactive hyperemia, adrenergic nerves and, G392
- Prostacyclin, nicotine effects, gastric mucosal injury, G1037
- Prostaglandin E₂
 cAMP-mediated pepsinogen secretion and, chief cells, G858
 nicotine effects, gastric mucosal injury, G1037
- Prostaglandins
 chloride secretion and, distal colonic mucosa, G443
 glutathione and, ethanol-induced gastric injury, G966
 inflammation and blood flow, colonic, G332
 mucous release and, gastric mucous cells, G662
 specific effects of interleukin-1, gastric acid secretion, G559
- Protein kinase
 cAMP-dependent
 anion channels in excised patches, G992
 prostaglandin E₂ effects, chief cells, G858
- Protein kinase C
 carbachol and, modulation of CCK receptors, pancreatic acini, G981
 carbachol effects, colonic cells, G220
 glutathione efflux and, liver, G578
- Radiation, indomethacin and, jejunal prostaglandins and motility, G145
- Ranitidine, gastric hypersecretion, G295
- Receptors
 brain, gastrointestinal blood flow and function, G701
 CCK, modulation by carbachol, pancreatic acini, G981
 H₁ and H₂ antagonists, glycogenolysis and, hepatocytes, G1000
 insulin, hepatic, impairment with ethanol, G199
 lactoferrin, intestinal brush-border membranes, fetal, G841
 mannose, hepatic processing of renin, G349
- muscarinic
 agonist-induced downregulation, pancreatic acini, G128
 esophageal mucosa, G464
 serotonin, submucous neurons in colon (guinea pig), G1017
 somatostatin, muscle cell relaxation and (guinea pig), G45
- Reflexes
 intestinal, changes in tone, G280
 peristaltic, duodenal accommodation (guinea pig), G364
- Renin, recombinant, hepatic processing of, G349
- Renzapride, stimulation of motility, gastroparesis model, G426
- Reserpine, reactive hyperemia, adrenergic nerves and, G392
- Resistance
 duodenal, accommodation and (guinea pig), G364
 vascular, hepatic venular pressure, G539
- Rhythm
 basic electrical, migrating myoelectric complex, G1079
 circadian
 anal resting pressure, healthy humans, G823
 bile formation, liver denervation effects, G799
- Ribonucleic acid, intestinal mucosal growth, luminal polyamine effects, G504
- S**
- Saliva
 bicarbonate and chloride loss, secretagogues and, G111
 secretagogue effects, cytosolic calcium ions, G359
- Salivary gland, calcium influx, sustained fluid and electrolyte secretion, G1043
- Secretagogues
 acinar cell coupling, G22
 bicarbonate and chloride loss, parotid acini, G111
 cytosolic calcium ions and, submandibular granular ducts and acini, G359
 specific effects of interleukin-1, gastric acid secretion, G559
- Sensorial pathways, intestinal, reflex changes in tone, G280
- Sensory nerves, capsaicin-sensitive, gastric, CGRP effects, G657
- Sepsis, hypermetabolic, glucose uptake and, intestinal mucosa, G287
- Serotonin
 neural, chloride secretion and, distal colon (guinea pig), G833
 receptors: *see* Receptors
- Shock, endotoxic, neutrophil-induced liver cell injury, G1051
- Shunt: *see also* Bypass
 portal-systemic, postoperative course after portacaval anastomosis, G1072
- Sodium
 absorption, descending colon, species differences (cattle, sheep), G433
 gastric secretion, acetazolamide and, G320
 hepatocellular uptake, oleate effects, G1024

G1092

- Sodium-hydrogen exchange, plasma membrane, hepatocytes, G803
 Sodium-hydrogen exchanger, polarized, Caco-2 cells, G229
 Sodium-potassium-chloride, transport, calcium-dependent, sublingual mucous acini, G1043
 Somatostatin
 intestinal, regulation by bombesin, G71
 muscle cell relaxation by, inhibition of (guinea pig), G45
 release, capsaicin-stimulated CGRP and, stomach, G770
 secretion, bombesin/GRP-stimulated, neurons in fundus, G885
 Species differences, fluid absorption, descending colon (cattle, sheep), G433
 Splanchnic afferents, capsaicin-sensitive, gastric, CGRP effects, G657
 Staurosporine, neurotensin release and increased calcium, enteric endocrine cells, G497
 Stearate derivative, fluorescent, hepatic transport, G83
 Stomach
 glutathione protection, ethanol injury, G966
 mucosal injury, aggravation by intravenous nicotine, G1037
 somatostatin release, capsaicin-stimulated CGRP and, G770
 surface cells, intracellular pH in, G548
 Streptozotocin, diabetes induced by, altered glucose carrier expression in, G585
 Submandibular gland, ablation, inhibition of activity-induced parotid growth, G723
 Submandibular granular ducts, acini and, secretagogue effects on calcium ions, G359
 Substrates, oxidation, energy for Kupffer and endothelial cells, G185

SUBJECT INDEX TO VOLUME 24

- Sucrase- α -dextrinase, brush-border precursor, postinsertional processing of, intestine, G847
 Superoxide anion radical, release, Kupffer cells upon hypoxia-reoxygenation, G602
 Superoxide anions, generation, TNF- α and, Kupffer cells and liver, G891
 Surfactants
 hydrophobic, cholesterol metabolism, intestinal mucosa, G256
 particles, intestinal, developmental expression, G269
 Sympathetic nerve
 regulation of bile secretion, liver, G775
 stimulation, reactive hyperemia and, G392
- T**
- Taurocholate, sodium uptake and, hepatocellular, G1024
 Tetraethylammonium, myogenic control, esophageal, G377
 Theophylline, apical tubulovesicles and hydrogen secretion, intestine (salamander), G50
 TNF- α : see Tumor necrosis factor- α
 Triacylglycerol, hydrolysis, lipoprotein lipase effects, newborn liver, G641
 Tubulovesicles, apical, hydrogen secretion and, intestine (salamander), G50
 Tumor necrosis factor, specific effects of interleukin-1, gastric acid secretion, G559
 Tumor necrosis factor- α , superoxide anion generation and, liver and Kupffer cells, G891
 Tyrosine aminotransferase, ethanol effects, liver, G199
- U**
- Ulcer, indomethacin-induced, oxygen radicals and, G470

- Ursodeoxycholic acid, intracellular and biliary pH with, G373

V

- Vagal afferents, capsaicin-sensitive, gastric, CGRP effects, G657
 Vagotomy
 gastric hypersecretion, G295
 truncal, cholinergic dependence of gallbladder response to CCK, G565
 Vagus nerve, stimulation, gastric damage and, G104
 Vasodilation, adenosine, intestinal mucosa, G9
 Vasopressin, myosin light chain-1 stimulation, hepatocytes, G312
 Vasopressor hormones, glutathione efflux and, liver, G578
 Volume, regulatory, decrease, liver, chloride ions and, G340

W

- Water
 absorption, descending colon, species differences (cattle, sheep), G433
 fecal, cytotoxicity of, dietary calcium phosphate effects, G907
 labeled, deuterium oxide as substitute for, liver studies, G929

X

- X-irradiation, prostaglandins after, jejunal, G145

Y

- Yohimbine, apical tubulovesicles and hydrogen secretion, intestine (salamander), G50
